CAME ON...

Dear friend let`s climb together!

Climbing is a kind of **ART**. It is also **EXPLOSION** of **EXTASY** and pure **FUN**. The **FLOW** of **MAGIC** movements with the **ESSENCE** of **EQUILIBRIUM**. Don`t you feel like this?

In the early days when you **START** climbing you think this is maybe just a **DREAM** or even **ILLUSION** but later when you gain some **ENDURANCE** and combine it with necessary **CONTROL** of your body and mind and with positive **EXPERIENCE** you just begin to feel the real **SYNERGY**.

Like so many times in the past another route just became your last **OBSESSION**. You are again in full **ACTION** just below the crux and you feel the real **POWER** of **GRAVITY**. Go on! Just **JUMP** to the next **STEP** use your right **FOOT** on the smallest **RELIEF**... Only ones with the **VISION** can succeed. Don`t give up although the **INTENSITY** of **PUMP** is amazing. Try to beat this **MINUS** because the **ESCAPE** is near. **PINCH** it, hit the next few **POCKETS** with absolute **PRECISION**, use that **HOOK** on the **ARETE** and never even think to let your **EMOTION** under **PRESSURE**. Keep cool as **ICE** because this is really a big **PLUS**. But does this have a **SENSE** at all?

Oh yes! The **INSPIRATION** and **MOTIVATION** to invest all this **ENERGY** were so big that it is a **CHALLENGE** to complete this **ADVENTURE** now. Keep on with **THE BEST PERFORMANCE** ever. Keep the right **RHYTHM** and let there be no unpleasant **SURPRISE**!

Oh, almost lost the **BALANCE**? Final rush of **ADRENALIN**. But few seconds later already a **MIX** of **EUPHORIA** and **LEVITATION**. It is done!!! What a **FEELING**!

ILLUSION is the **SPIRIT** of every **PASSION**.

MRclimbing can share all this beautiful moments with you. So let`s climb together to **infinity**...

» INFO

Welcome to presentation of our latest achievements. Like always in the past after many years of hard work all our products are still created with passion and sensation of climbing with addition of vast experience and research. The time told us that this is the only right way... We wish you maximum fun while selecting and of course using them. Your satisfaction is our pleasure.

Yours MRclimbing team - prime provider of finest climbing holds since 1993.

Few things worth to know about our products:

Suitability: our climbing holds and other products are suitable for every climber of any skill level - from beginner or a child to World Cup competition climber. All shapes of holds are safe to be used on any climbing wall and any climbing wall angle, from less than vertical slab to steepest roof. Which set of holds is best for you on your wall depends on how strong you are and how hard you like to climb.

Size: we hope that every imaginable size of hold is represented in our range. We offer you holds in 8 different sizes: XS (footholds and micro holds), S, M, L, XL, XXL, MEGA and GIGA (extremely big holds). Every page with holds has a sign of which size these holds are. For better understanding we also provided a realistic scale in centimetres.

Colours: for our holds we use a wide variety of strong and bright colours and two-colour swirls. Besides nice look these intense and easy recognizable colours help you set and climb routes "by colours". Our latest novelty for special events is a fluorescent (neon) orange colour. It is not just another different colour at daylight it is really something extra. Under exposure to "black light" this holds glow in dark. Standard colours: orange, red, violet, blue, green, yellow, white, grey and black. Standard swirls: violet/white, red/yellow, blue/yellow and black/yellow. Special colour: Neon orange. Custom colours are available by request.

Texture: "HandTex" - texture used for all our handholds in all sizes. Fine-grained positive texture which became during past years a synonym for good friction, finger friendliness and easy cleaning. "FrictionTex" - long lasting coarse-grained positive texture developed specially for footholds. Suitable for intensive use, it provides maximum friction. "VolumeTex" - bit more coarse than "HandTex". Very durable but still finger friendly. Positive texture, easy to clean. Exclusively used for our range of high profile volumes.

Mounting of bolt-on holds: standard allen bolts M10 fit best. Most of our holds have an additional place for screw (self-driving flathead screws 4 to 5mm can be used) to prevent spinning. This is usually not necessary but it is nice for competitions. Mounting of screw-on holds: any self-driving flathead screws 4 to 5mm can be used.

Cleaning: because of positive textures MRclimbing holds are very easy to clean. Just use any nylon brush for quick cleaning while holds are on the wall. For radical cleaning use nylon brush and soapy water or high pressure water cleaners. Note: use of very aggressive detergents may cause fading of the colours, but the texture stays intact.

Special features: dualtexture holds for advanced use, screw-on holds with one straight edge specially designed to be attached on any wall`s edge or arete, holds for dry tooling. All GIGA holds are extra reinforced. Holds in set Art (size GIGA) are made with hollow-back technology for easier handling.

Warranty: each hold is branded with a MRclimbing logo which is by itself a certificate of origin and a sign of perfect finish. Every our product has a warranty.

Products range: 2007 and later.

10 cm

The smallest bolt-on handholds in our range.
Designed with special care so that all radiuses are still fingerfriendly in spite of their micro size.
Can be used also as footholds.

» Foot

footholds

Classic range of basic footholds suitable for each and every climbing wall and any climbing angle.
Very diverse and many-sided footholds.
Long lasting "FrictionTex" texture.

» POCKETS

3 XXL, 4 XL, 1 L, 1 M

10 cm

Set of pure pockets.

From shallow 2 finger pocket to deep 3 finger pocket.

Very ergonomic and comfortable.

SPECIAL
SETS

Set "The best of MRclimbing" is a flashback to our achievements during the years 1999 - 2002.

A special combination of most wanted single shapes designed in the past years.

Diverse shapes: from middle sized edge to large jug and huge sloper.

Perfect for everyone who likes to climb on legendary holds.

» SURPRISE

1 MEGA, 1 XXL, 3 XL

10 cm

Set of MRclimbing "dual-texture" holds.

From far away these holds seem to be just as any other holds. From near they are real surprise. Half of each hold has normal texture the other part is smooth and has no texture. This special feature makes these holds perfect for advanced climbing technique training. They are also great for building very realistic routes for pure on-sighting of any level.

For climbers with high demands.

SCREW ON

CHALLENGE

10 cm

As all the other screw-on holds also these are made to enrich climbing on flat wall panels. These holds open previously unused sections of the wall and make climbing more interesting, fun and exciting.

They can be simply screwed anywhere on the wall, specially where there are no t-nuts.

Of course use of this micro holds as handholds is challenging by itself...

They can be used also as technical footholds.

SENSE

footholds

SCREEN

This set was basically designed as a set of low profile technical footholds.

To make them usefull also as micro handholds we just designed them with a new texture which is still quite durable for footholds and not too coarse to be suitable for micro handholds.

Ideal for improving foot technique.

Easy to mount anywhere on the wall.

» HOOK

2 MEGA, 1 XXL, 2 XL, 3L, 2 M

» ICE

3 XXL, 3 XL, 2L, 2 M

DRY
TOOLING

After a very successful launch of set Ice these holds represent a very logical next step regarding dry tooling holds with the same technical characteristics.

Because dry tooling is not just pulling we decided to make a set of non-classic but as much as possible different and interesting shapes which offer and enforce mostly (very) tricky hooking possibilities.

As a highlight of this set there are two holds which can be used individually but in combination they form a great crack of any kind.

10 holds, 13 hooking possibilities plus a crack.

Our first set of holds designed (in the year 2002) specially for dry tooling.

10 holds, 18 hooking possibilities - from micro hook to large "jug".

No texture - to prevent hand grasping and to provide more precise hooking feeling.

Easy mounting with usual M10 (or even M8) allen bolts as for all other holds.

Made from extra strong material.

Suitable for any wall angle.

Dry tooling sections of all climbing routes during Ice World Championships 2004 and 2005 in Saas-Fee have been set up exclusively with these holds.

» FANTASY

50 cm

VOLUME

- Lightweight volume.
- Adds third dimension to flat walls.
- Size: 76x60x26cm.
- 7 attachment points for additional holds.
- Long lasting "VolumeTex" texture for intensive use, maximum friction and easy cleaning.
- Provided with mounting hardware (10 self-driving flathead screws for easy application).

» UTOPIA

- Lightweight volume.
- Adds third dimension to flat walls.
- Size: 77x62x38cm.
- 7 attachment points for additional holds.
- Long lasting "VolumeTex" texture for intensive use, maximum friction and easy cleaning.
- Provided with mounting hardware (9 self-driving flathead screws for easy application).

» KRICK-KNACK

50 cm

- Lightweight volume.
- Adds third dimension to flat walls.
- Size: 71x46x21cm.
- 5 attachment points for additional holds.
- Long lasting "VolumeTex" texture for intensive use, maximum friction and easy cleaning.
- Provided with mounting hardware (8 self-driving flathead screws for easy application).

» CAMPUS RUNGS

Wooden rungs for comfortable low-impact and pain-free "campusing".

Two sizes: 40cm long, 2cm thick and 40cm long, 3cm thick.

Each size rung has an incut side and a flat side.

Ergonomic radiuses.

Pre-drilled.

Includes mounting hardware.

» CAMPUS BOARD

Most powerful training tool to train (dynamic) power and also finger strength for climbing.

Size: 120x80cm.

Two rows of 6 to 8 rungs in 2 sizes in different combinations (incut or flat) for different skill levels.

Includes installation and training guide.

TRAINING TOOLS

» TRAINING BAR

Perfect training tool to train general upper body strength - just by itself or to finish a climbing workout when your fingers can not hold you on holds any more.

Made from stainless steel, so it will always stay as new in spite of training with sweaty hands.

1m wide, pleasant radius.

Adjustable cords.

Swinging construction helps preventing elbow injuries.

Fast and easy mounting and dismantling.

Mounting hardware with installation guide is also available.

CRASH PAD

Size: 120x90x8cm (open).

Hinged design.

Outer material is extreme long-lasting Cordura 1100 by DuPont.

Unique combination of 2 layers of closed cell foam and 1 layer of open cell foam provide maximum shock absorption and comfortable landing zone.

Adjustable and removable shoulder straps (backpack or over the shoulder style), 2 ergonomic suitcase-style handles.

2 loops for brush, 6 short and 2 long adjustable loops at the back side for carrying other climbing equipment.

Lightweight - 3,9kg only.

CHALK

"G force reducer" - extra pure chalk for climbing.

Recloseable zip bag for easy handling.

Packing: 60g.
